Software Engineer · AI & RAG Engineer · Backend Engineer

Summary

Computer Science graduate building production AI systems. Built ResearchMind AI, an Agentic RAG platform using LangGraph, hybrid search, and reranking, and JobFit, an AI job-matching platform where Redis caching reduced API latency from 4s to 5ms (99.9%). Cybersecurity background focused on building fast, secure, and scalable AI products.

Experience

Cyber Cell Intern

Jan 2026 – June 2026

State Cyber Crime Investigation Unit, Govt. of Maharashtra

Nagpur, India

- Analyzed **20–30 weekly** phishing and financial fraud complaints, extracting digital artefacts and investigative indicators.
- Contributed to a monitoring portal using Python, FastAPI, PostgreSQL, React, and REST APIs for processing.

Digital Forensics Intern

Jun 2025 – Jul 2025

Crypto Forensic Technology

Nagpur, India

- Conducted digital evidence analysis using **SHA-256 hashing** for file integrity verification and chain-of-custody compliance.
- Authored forensic reports for end-to-end investigation workflows aligned with **legal admissibility standards**.

Projects

ResearchMind AI — Agentic RAG Platform [Live Demo](#) [GitHub](#)

TypeScript · Python · FastAPI · PostgreSQL · Redis · ChromaDB · LangChain · LangGraph · LangSmith

- Built a **LangGraph ReAct agent** with human-in-the-loop interrupts and streaming for multi-step document research.
- Combined **hybrid BM25 + vector search** (RRF fusion) with BGE cross-encoder reranking for higher-precision retrieval.
- Integrated **LangSmith** for agent tracing and RAG observability, monitoring retrieval, tool calls, LLM execution, and **contradiction detection**.
- Designed **Study Mode** (adaptive quizzes, flashcards, interview practice) and a skill-gap **Roadmap**, gated behind a **Razorpay**-powered freemium tier with Redis-based rate limiting for usage quotas.
- Deployed to **AWS EC2** with **S3** storage, scoped **IAM** roles, **CloudWatch** monitoring, and **GitHub Actions** CI/CD.

JobFit — AI Job Matching Platform [Live Demo](#) [GitHub](#)

React · Node.js · PostgreSQL · Redis · Docker · Gemini AI · GitHub Actions

- Full-stack app where users upload resumes and get **Gemini AI match scores (0–100)** with skill-gap analysis and an AI Career Assistant for job-search guidance.
- Reduced repeat API latency **4s→5ms (99.9%)** via Redis caching with MD5 cache keys — **50 concurrent requests**.
- Secure auth: httpOnly JWT cookies (**30-min/7-day rotation**), bcrypt, parameterised SQL, rate limiting — **OWASP Top 10** aligned.
- Dockerized **5 microservices** with GitHub Actions; role-based admin dashboard for PostgreSQL access control & analytics.

Technical Skills

Frontend React, TypeScript, JavaScript, Tailwind CSS, HTML5 CSS3

Backend Node.js, Express.js, Python, FastAPI, REST APIs, JWT Auth

AI/ML LangChain, LangGraph, LangSmith, Multi-query RAG, BGE Reranker,

DB & Cache PostgreSQL, MongoDB, Redis, ChromaDB

DevOps Docker, GitHub Actions (CI/CD), AWS (EC2, S3, IAM, CloudWatch), Nginx, n8n, Git

Security OWASP Top 10, AES-256, SHA-256, Cyber Forensics

Education

G.H. Rasoni College of Engineering and Management

July 2026

B.Tech in Computer Science — Cyber Security

Nagpur, India

Certifications

- Certified Cyber Forensic Examiner (2025) • Firebase Essentials (2024) • Full Stack Web Development Bootcamp (2024)
- Deloitte Cybersecurity Virtual Experience (2024)
